Defragmenter Lite Full Product Key

This small tool will remove the main reason for the file systems being 'fragmented' - the Windows/DOS pagefile. The pagefile is often much bigger than the memory used by your applications and is located in the 'swapfile' of your system. Automatically disables programs, shows warnings when switching to new disk/partition etc. and has a program notifier. Auto defragment drives (you may not need this) Optionally (use the hotkeys to launch): Scandisk (i.e. defrag your disk) Show/hide/rename drives and partitions Disk space indicator This free version has the minimum functionality required for disk defragmentation. Use it as a trial version and then purchase the full version to gain all the extra features. Version 1.1 Added: Quit application when single click OK is used. Added: New options: 'Set pagefile' and 'Set pagefile size' Version 1.0 Moved from Trial to Full version Fixed: - File system name of C:\ was not displayed - Some commands were missing. Fixed: - Lacking of hotkeys when setting the pagefile size was fixed - Added hotkeys for all settings Removed: - All unused GUI elements - Remaining trial limitations 0.11 18.11.2009 Added: New: Show all drives on screen Fixed: - Lacking of hotkeys when selecting drives 0.10 26.09.2009 Added: New: Show all disks on screen Fixed: - Defragment disk failed when Win7 was launched 0.05 20.09.2009 Added: New: Show all partitions on screen Added: A GUI for easy setup 0.03 20.09.2009 Added: Config file support Added: Start-on-boot feature 0.02 24.08.2009 Added: Now config files can be installed from disk Added: Automatic: run script on boot/shutdown Added: Default configuration 0.01 21.08.2009 Added: first release Added: Start-on-boot feature Added: Configuration feature Added:

What's New in the Defragmenter Lite?

*** The lightweight, one-click solution to defragmenting your disks. There is no need to turn off the computer, wait for the defragmentation to complete and reboot. Your computer can be left on while defragmenting. No need to write down a long list of commands that is hard to remember. Don't have to worry about power-off your computer, it will stay on even if you do. *** No toolbars. No GUI. If you don't like the toolbar, no problem. You can also use the buttons and menu. Works for all Windows versions. Windows 98/Windows ME/Windows 2000/Windows XP/Windows Vista/Windows 7/Windows 8/Windows 8.1/Windows 10 *** No moving files around. No re-arranging directories. All the features of a full defragmentation tool. Features: Disable screen saver. No need to do a DOS format (recall: all drives are mapped as DD: drive letter for DOS). Automatic defragmentation. Does not leave old files, sub-folders and sub-sub-folders, and so on on the disk. System wide defragmentation (thru all of your disks). Avoid disk defragmentation if your file system is dirty. Automatic update to new files. No restarts and reboots. Fully compatible with all Windows (95/98/ME/2000/XP/Vista/7/8/8.1/10) versions. Works even if you have only one hard disk. No mouse clicks. No unnecessary disk traffic. No use of 'defrag folder' buttons. No Run dialog boxes. No graphical windows. No wizards or buttons. Allows to have multiple defragmentation workbooks per computer. Self-adjusts on new file updates. Easily add and remove disks. Doesn't need to be run as administrator. Easy to learn. Does not show the progress/percentages. Automatically hide/display the program icon in the system tray when inactive/active. Automatically hide/display the program icon in the system tray when the program is hidden/visible. Automatically show/hide the program icon in the system tray when the program is starting/terminating. Automatically create/open a new folder for the workbook when program is started/terminated. Works even if the program icon in the system tray is hidden. Automatically check for updated versions of the program. No need to manually shut down and restart the computer. A note for those using 32-bit version: uses x86 MS-DOS extension for disk drive, not x64 MS-DOS extension. No registry required. No need to restart Windows. No need to be logged in as administrator. No need to register.

System Requirements For Defragmenter Lite:

Minimum: OS: Windows XP, Vista, 7, 8 Processor: Intel Pentium 4 or equivalent Memory: 2 GB RAM Graphics: DirectX 8-capable system with Pixel Shader 3.0 support DirectX: Version 9.0 Hard Disk Space: 1.5 GB available space Additional Notes: 1. If you are unable to see the Unigine logo, make sure that you have selected Fullscreen mode. 2. You may need
