Before I begin I will be sure to mention that I am a complete noob in terms of building web applications. I have been using NHibernate for data access for the past few years but now I have been told that it is time to make the switch. The problem that I have is that I don't know where to start. I have seen tutorials using entity framework and repository, and I have read about unit of work, but I honestly don't know where to start. I have also seen tutorials using Fluent NHiber
